mypolo.com.au

A PROUDLY AUSTRALIAN OWNED COMPANY SINCE 1984

FEATURES

- Clean front face – stylish, uncluttered and seamless design
- Concealed top air outlet – minimal clearance required, can be placed behind furniture
- Compact width – allows for installation in tight spaces or on short walls
- Electronic thermostat – graduated in degrees Centigrade
- IP24 splash proof rating – suitable for bathrooms
- Rigid metal cabinet – thickness 0.8mm
- Supplied with metal bracket and feet with castors - for permanent fixing to a wall or portable use
- Timer models – 7 day programmable digital timer with manual override
- 5 year replacement warranty

WHAT SIZE DO I NEED?

The Polo 'E' series range of panel heaters consists of four different heating capacities and 8 models – four manual 'E' models and four with a 7 day digital timer 'ET' models.

Determining the correct sized heater will ensure optimum performance and economical running. As a rough guide use 100 watts per square metre of floor area (with standard ceiling insulation). For accurate sizing consult your heating dealer.

MODEL E without timer ET with timer	RATING	APPROX RUNNING COST c/kWh Tariff c/kWh			DIMENSIONS WxHxD (mm)	APPROX AREA HEATED	SUGGESTED PLACEMENT
		20	25	30			
E100, ET100	1000 w	10	13	15	455 x 440 x 85	10 m ²	Bathroom, ensuite, study, small bedroom
E150, ET150	1500 w	15	19	23	615 x 440 x 85	15 m ²	Medium bedroom, home office
E200, ET200	2000 w	20	25	30	775 x 440 x 85	20 m ²	Living area, large bedroom
E240, ET240	2400 w	24	30	36	1035 x 440 x 85	24 m ²	Larger living area, hallway

Note (1) Running cost calculations assume cycling of 50%. Your tariff rate (see your latest power bill) and hourly running costs may be different to the ones stated.

Note (2) Slightly less or greater areas may be covered depending upon ceiling height, window area and coverings, building construction and insulation properties. If in doubt select a higher rated heater, as undersizing will result in higher running costs.
